MEDI-CAL FUNDED INDUCED ABORTIONS 1997

Medi-Cal Report published March 1999

ABSTRACT

This report provides summary tables on the number of **fee-for-service** Medi-Cal funded abortions performed during 1997, the type of facility where a procedure was performed, and Medi-Cal expenditures for these procedures. The data are presented on both county and state levels.

Questions regarding data provided in this report and any other inquiries related to Medi-Cal funded deliveries in California may be directed to [Samira Al-Qazzaz](#) at (916) 657-2966.

HIGHLIGHTS

- o Medi-Cal funded a total of 65,617 fee-for-service (FFS) abortions¹ in 1997 and paid an average of \$329 per procedure, totaling \$21,583,134 million for all abortions.
- o There was an estimated 46,693 abortions for enrollees in prepaid health plans and managed care programs excluding Santa Barbara and San Mateo.
- o The average monthly rate of abortions per 1, 000 eligible women 15-45 years old was 6.67.
- o Approximately one-third, 32 percent, of Medi-Cal funded abortions were performed for women 20-24 years old.
- o Abortion services to hispanic females accounted for 31 percent of total abortions exceeding, for the fifth year in a row, that of white females.
- o OBRA eligibles accounted for about ten percent of total abortions.
- o Two thirds of the abortions, 67 percent, were done at a physician's office averaging 45 abortions per office location.
- o The cost of an abortion performed on a hospital inpatient basis averaged \$1,979 per abortion. Abortions done at a physician's office averaged \$286 per abortion which is lower than that of abortions done at clinics and hospital outpatient.
- o The number of Medi-Cal eligible women who received abortion services was 61,589. Ninety-four percent of these women had only one abortion in 1997.

¹ The term abortion as used in the report refers to induced abortions only.

INTRODUCTION

The number of induced abortions funded by Medi-Cal during 1997, on a **fee-for-service** basis, 65,617, is about 21 percent lower than in 1996. Medi-Cal payments for these abortions was 20 percent lower than in 1996.

The decline is partly due to the implementation of health care plans (HCP) as explained in "Data Qualification" on page 2. Claims for services rendered to enrollees in these plans were not completed for the period of this report. The estimated number of non-fee-for-service abortions is 46,693.

While the number of FFS Medi-Cal funded abortions decreased 21 percent, the number of eligible women ages 15-45 decreased 24 percent from 1996 to 1997. This resulted in about five percent increase in the rate of average monthly number of abortions per 1,000 FFS eligible women 15-45 years old. This is the first increase in the rate of abortions since 1987.

Unfortunately, the total number of abortions for California women in 1997 is not available. The 1996 *preliminary* total of 280,180 was estimated by the Center for Disease Control (CDC). It reflects a three percent drop from the 1995 estimated total of 289,987. Medi-Cal funded an estimated 112,990 abortions during 1996, including an estimated total of 30,421 abortions for health care plans' enrollees. Accordingly, Medi-Cal funded abortions accounted for 40 percent of the 1996 CDC *preliminary* estimate.

DATA QUALIFICATIONS

This report discusses abortions which occurred during calendar year 1997 and appear on the Medi-Cal paid claims file between January 1997 and September 1998. The 21-month file was used in order to allow for delays in submitting or processing hospitals, clinics and physicians claims.

Abortions performed for enrollees in health care plans (HCP), otherwise known as managed care, are not included in this report. Encounter claims for these HCPs, excluding *San Mateo* and *Santa Barbara*, are reported on sporadic basis and therefore are incomplete. Due to the limited reporting it is not known exactly how many abortions these plans have accounted for during 1997. Abortion estimates for non-FFS enrollees in counties where HCPs are implemented are provided in Table A below.

TABLE A

**ESTIMATED NUMBER OF MEDI-CAL FUNDED ABORTIONS
FOR ENROLLEES IN HEALTH CARE PLANS
WOMEN AGES 15-45, CALIFORNIA 1997**

COUNTY OF BENEFICIARY	FFS (ACTUAL)	NON-FFS (ESTIMATED)	TOTAL (ESTIMATED)
TOTAL	52,239	46,693	98,932
ALAMEDA	2,668	4,496	7,164
CONTRA COSTA	1,527	1,988	3,515
FRESNO	2,175	2,630	4,805
KERN	844	1,685	2,529
LOS ANGELES	23,655	10,164	33,819
ORANGE	932	3,594	4,526
RIVERSIDE	2,324	1,736	4,060
SACRAMENTO	2,562	3,938	6,500
SAN BERNARDINO	3,742	2,312	6,054
SAN DIEGO	3,184	2,584	5,768
SAN FRANCISCO	1,737	1,798	3,535
SAN JOAQUIN	861	1,541	2,402
SANTA CLARA	2,693	2,630	5,323
SANTA CRUZ	274	940	1,214
SOLANO	550	1,612	2,162
SONOMA	1,171	575	1,746
STANISLAUS	1,340	209	1,549

NOTE: These estimates are based on the ratio of abortions to eligible women 15-45 during CY 1993 which is the last year prior to the implementation of HCPs. Prepaid health plans (PHP) and organized health systems of San Mateo and Santa Barbara were in effect. This ratio was then applied to total number of eligible women during July 1997 using the January 1998 eligibility file.

Medi-Cal FFS Eligibles, Induced Abortions and Expenditures

While total Medi-Cal FFS expenditures increased 91 percent during the past ten years payments for Medi-Cal funded induced abortions for the same period fluctuated from a high of \$40.7 million in 1991 to a low of \$21.6 million in 1997. The 1997 total expenditures is 29 percent less than the 1988 total¹.

The average monthly number of FFS eligible women ages 15-45 dropped 24 percent from 1996 to 1997, while the number of abortions for the same age group dropped about 21 percent.

The average monthly rate of abortions per 1,000 eligible women has been steadily declining from 10.5 in 1988 to 6.3 in 1996 then slightly increased to 6.7 in 1997.

As mentioned in *Data Qualifications* the availability of data from HCP is limited starting with 1994. This explains the drop in the number of reported abortion services.

California Department of Health Services, HR70 Summary, Maternal Care File, 1997.

Distribution of Medi-Cal Funded Induced Abortions by Age and Ethnicity

Women ages 20-24 accounted for the highest percent of abortions among all ethnic groups.

For the fifth year in a row, hispanic women have accounted for the highest percentage of abortions, 30 percent during 1993 and 1994, 31 percent during 1995, 33 percent during 1996 and 31 in 1997. Prior to that white women accounted for the highest percentage followed by black women.

Compared to 1990, the percentage of abortions for women of Asian and Pacific Islands origin to total abortions has remained the same (five percent). In the mean time the percentage of abortions for black women has dropped five and a half percent from 26.5 percent in 1990 to about 20 percent in 1997.

Distribution of Medi-Cal Funded Induced Abortions by Age and Aid Category

As in previous years, eligible women in the aid category AFDC (families) accounted for the highest percentage of Medi-Cal funded induced abortions, 85.7 percent. The second largest group is the OBRA¹ which accounted for ten percent of total abortions, the same as in 1996.

It is important to keep in mind that the majority of health care plans do not cover services for OBRA and income disregard eligibles. The totals provided in these tables are strictly for FFS eligibles.

/1/ OBRA and IRCA refer to two federally mandated programs; the Omnibus Budget Reconciliation Act (OBRA) and the Immigration Reform and Control Act (IRCA) both of 1986. Under IRCA the status of certain aliens unlawfully residing in the United States may be adjusted to permanent resident status. Otherwise eligible amnesty aliens who are aged, blind, disabled, or under 18 are entitled to full Medi-Cal services. Those who are not, are entitled to restricted Medi-Cal services during the first five years of amnesty, and to full services thereafter. OBRA applies to other aliens such as undocumented and temporary visa aliens. They are only entitled to restricted Medi-Cal benefits. The IRCA program was discontinued in December 1994.

/2/ Includes abortions for OBRA eligible women in the income disregard group.

/3/ This federal and state funded program became effective in July 1989 under the title 185 percent poverty. The name change occurred in September 1994. It extended Medi-Cal coverage for program related services to pregnant women whose family income does not exceed 185 percent of the federal poverty level.

/4/ Includes, among others, abortions for the 200 percent poverty eligible women.

Note: See Table 9 for aid categories' distribution by county.

Source: State of California, Department of Health Services, HR70 Summary, Maternal Care File, 1997.

Distribution of Medi-Cal Funded Induced Abortions by Type of Facility

During 1997 the largest number of Medi-Cal funded abortions was performed at physicians' offices, accounting for 67 percent, followed by clinics, 19 percent. In comparison, fifty-nine percent of Medi-Cal payments for abortion services was to physicians. Abortions performed at physicians' offices were the least costly. At an average cost of \$286 per abortion it was \$25 less than the cost at a clinic and \$219 less than the cost at a hospital outpatient department.

The overall FFS average cost per abortion declined from \$368 in 1990 to \$327 in 1996 (see Table 1) however, the 1997 average was half of a percent higher than the 1996.

Even though only one-half of a percent of all abortions were performed at hospital inpatient departments, Medi-Cal payments for these abortions accounted for three percent of total Medi-Cal abortion expenditures, averaging \$1,979 per abortion. The average cost per abortion, excluding those done in hospital inpatient departments was \$320.

TABLE 4
BY TYPE OF FACILITY
FFS-ONLY, CALIFORNIA 1997

NOTE: See tables 10, 11 and 12 for type of facility distribution by county.

SOURCE: Department of Health Services, HR70 Summary, Maternal Care file, 1997.

The number of clinics providing abortion services remained just about the same as in 1996; 191 clinics in 1997 compared to 189 in 1996. The number of abortions done at these facilities dropped sixteen percent.

The number of all other types of facilities providing abortion services for FFS eligibles declined along with a noticeable decline in the number of abortions.

Data on the number of abortions performed for enrollees in the HCPs are not completed and therefore we can only estimate such totals as done in Data Qualifications on page 2.

Frequency of Medi-Cal Funded Induced Abortions

During 1997 a total of 61,115 FFS eligible females ages 15 to 45 had at least one abortion. Ninety four percent of these women, 57,336, had only one abortion.

The average monthly percentage of women who had at least one abortion was less than one percent of FFS Medi-Cal eligible women ages 15 to 45.

County Distributions of Medi-Cal Funded Induced Abortions

The following four tables display the distribution of abortion services by county. Individual county data do not necessarily reflect the same number and expenditure distributions which exist statewide.

Data provided in Tables 7, 8, 9, 10 and 13 are distributed by county of eligibility, i.e., the county that appears on the Medi-Cal card of the beneficiary. It should be noted that this is not necessarily the county of residence at the time of service, since a beneficiary could have moved from one county to another, and her eligibility might have been transferred at the time the service was rendered. Data in these tables may also include services performed outside California for a Medi-Cal beneficiary.

Data provided in Tables 11 and 12 are distributed by county of provider; i.e., county of occurrence
